SELF-SUPPORTING CONTAINMENT

CONTEG thinks first and foremost about the needs of its customers. It has developed universal stand-alone aisle for them.

Our solution allows a flexible choice of the number and size of switchboards used. Data center operators can easily move racks according to their current needs. In addition, the universal aisle can be customized according to the customer's wishes for the required aisle widths and lengths.

The universal aisle has a standard width of 1200 millimetres, but can be adapted to 1000 or 1800 millimetres. The length of the standard roof module is 2400 millimetres, it can be extended.

- Universal free-standing contained aisle solution.
- Clearance 2500 mm, to accommodate cabinets 52U with castors.
- Standard width 1200 mm, as option 1000 or 1800 mm.
- The length of the standard roof module is 2400 mm and can be extendable.
- Fully glass door with full logic opening system only.
- Blank panels to cover a gap instead of a rack or space above the cabinet.
- Roof polycarbonate panels width of 600 mm only; as an option a panel of 150 mm width with an entry for a fire protection (sprinkler) system.
- Support by hanging from the ceiling or can be supported by auxiliary posts.
